250	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance from	23NEO1
¿ <sup>&lt;</sup>	the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the distance of a player from basket for N shots. The index of array represents the position of the player. Score is calculated by multiplying the	ŢV
3BR23ME	position with the distance from the basket.	8 P
500	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	£026 388
000	Note:	
3ME0263	* A subarray is a contiguous part of array.	823M
	* Assume 1 based indexing.	382231
326 3BR21	* The array contains both negative and positive values.	· (c
320	* Assume the player is standing on a cartesian plane.	23ME026
